

Ear Cleaners, Gels and Flushes

Problem and Indication

Description

Product to Use

Very Thick Wax
GA Ear Flush Needed

Deep cleansing foaming ear wash to remove very thick wax under GA. Dogs only. Vet only. Wash out after use. Ensure TM is intact.

Otoprof

Bacteria / Red Itchy Ears
Pre-treatment / Maintenance
& Prevention

Chlorhexidine/Tris EDTA antiseptic ear cleaner. For use before the application of topical drops or in red/itchy ears where AB's are unnecessary.

Otodine

Yeast
Maintenance & Prevention

Acidifying and drying antibacterial/antifungal maintenance ear cleaner to control the overgrowth of yeast & bacteria in dogs prone to getting repeat ear problems eg Swimmers, Spaniels.

Cloreyxderm Oto

Excess Wax
Maintenance

Squalene-based ear cleaner when a stronger ceruminolytic action is required to remove thick and greasy wax in dogs, cats and rabbits

Otoact

Resistant Bacteria Identified
Pre-treatment

Sterile Tris EDTA solution and potentiating agent to be combined with AB in cases where resistant bacteria have been identified on culture.

Before-X

Tris EDTA and N-Acetylcysteine (NAC) solution which helps to inhibit the formation of, and disrupt established, bacterial biofilms. Will potentiate other AB solutions and is particularly useful where resistant bacteria have been identified on culture.

Tris-NAC

Bacteria & Yeast / Red & Itchy Ears
Where Alternative to AB is Sought
Pre-treatment / Maintenance
& Prevention

Peptide-based ear gel with antibacterial, antifungal and soothing action. Can be used as pre-treatment to enhance the efficacy of AB drops or used in cases where poly pharmacy drops may not be required. For maintenance in sensitive ears and ears with on going bacterial problems. To be used alongside an appropriate cleaner. Can be applied every 48 hours for improved owner compliance.

Peptivet Oto
Gel and Drops
