# Tsefalen Granular Oral Suspension

for cats & dogs up to 20kg

Nextmune UK has just launched Tsefalen Granular - the first and only cephalexin in oral suspension form for cats and small-medium sized dogs.

Tsefalen Granular is for the treatment of infections caused by bacteria susceptible to cephalexin for the following:

## Dogs:

- skin (deep pyoderma)
- respiratory system
- urogenital system
- gastrointestinal system
- soft tissue system

## Cats:

- skin (deep pyoderma)
- urogenital system
- gastrointestinal system
- soft tissue system

Tsefalen Granular can be administered directly into the mouth with the supplied syringe or mixed into food, making it ideal for animals who are difficult to pill.

Administer 15mg/kg (0.3ml of reconstituted product) twice daily. In severe or acute conditions, dose can be doubled to 30mg/kg (0.6ml of product) twice daily.
