# Linkskin

FROM THE INTESTINE TO THE SKIN

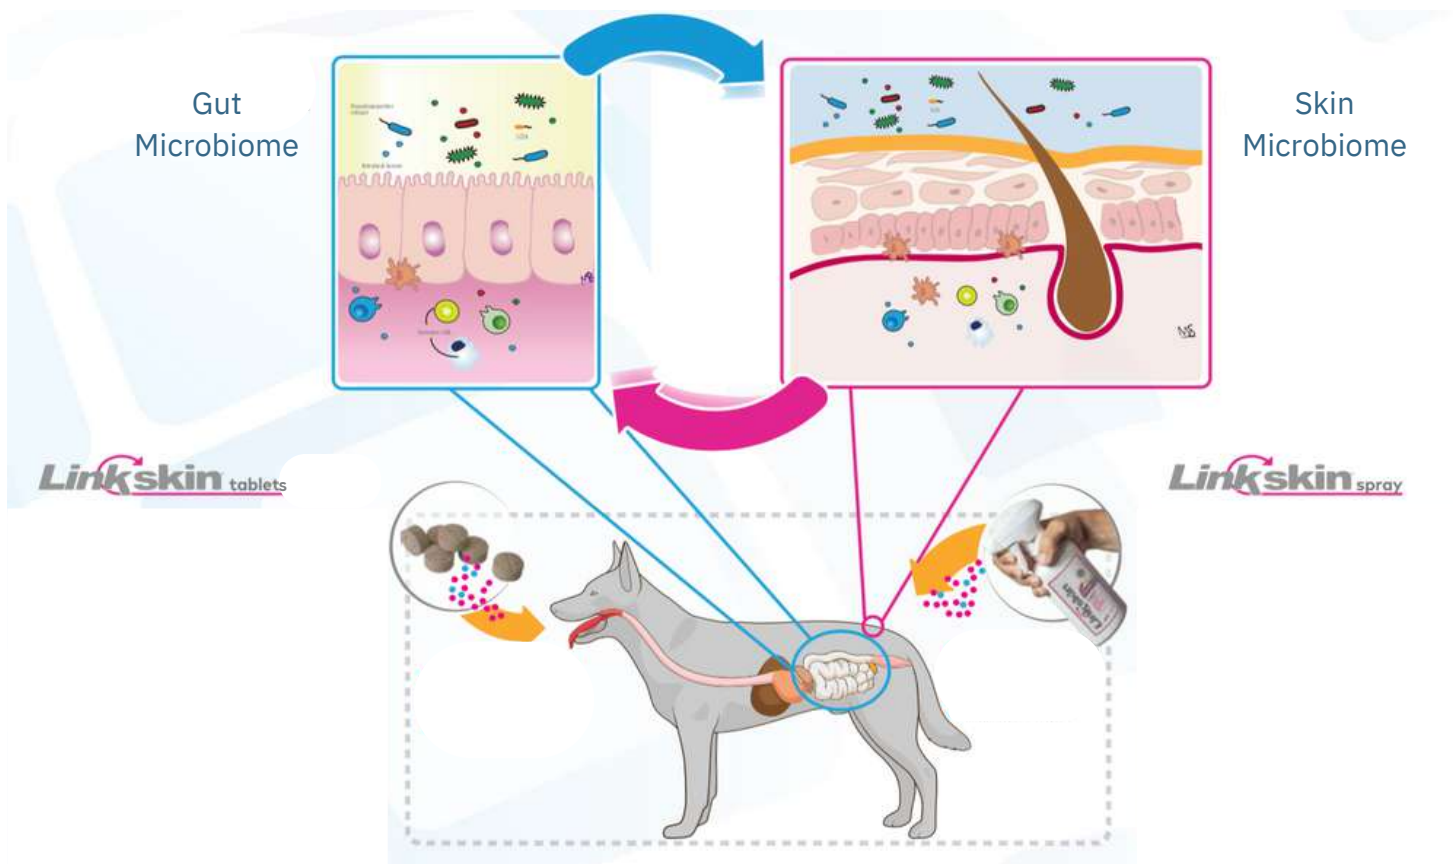

Allergic animals are known to have an imbalance of microflora in their gut and on their skin.

The gut-skin axis theory states an inherent relationship between health of the gut and of the skin. A dysbiosis of the gut microbiome is associated with an altered immune response that affects the health of other organs, including the skin.

A dysbiosis of the skin microbiome can result in poor skin barrier function, which allows greater penetration of allergens into the skin. These allergens are responsible for triggering the allergic response that results in inflammation.

Evidence shows that these imbalances in the gut and skin microbiomes predispose these animals to symptoms associated with allergy such as dry skin, redness, itch and recurrent skin problems.

Linkskin is a novel spray and tablet combination that aims to restore and maintain a healthy gut and skin microbiome.

# Linkskin<sup>®</sup> spray

*Linkskin is a unique spray that supports the skin barrier by rebalancing the skin microbiome and restoring skin homeostasis, reducing itch and redness caused by environmental and food sensitivities. Linkskin Spray contains tyndallised bacteria to help support a healthy skin microbiome and local immune system to help maintain healthy skin. It does not stain the coat and can be used in conjunction with Linkskin Tablets. Clinically proven and Dermatologist recommended.*

## Ingredients:

- **Tyndallised lactobacilli (*Lactobacillus rhamnosus*, *Lactobacillus reuteri*):** heat treated to ensures stability and efficacy in aqueous solution
- **Algal extracts:** provide a multitude of nutrients to support diversity and balance in the skin microbiota
- **Tamarind extract and vegetable polyphenols:** antioxidant properties that help to normalise the micro-environment and prevent skin irritation

### Directions for use

1. Shake the bottle before use.
2. Apply over the entire body surface until the skin is wet.
3. For thick or long coats, apply against the direction of hair growth.
4. Leave to dry and do not rinse off.
5. Apply once or twice daily.
6. Use for at least 15 days

Before

After

# Linkskin<sup>®</sup> tablets

*Linkskin Tablets is a novel symbiotic to help promote a healthy gut microbiome. Containing tyndallised bacteria and Vitamin D3, Linkskin Tablets help boost gut level immunity which is important for maintaining the health of other body systems such as the skin. Linkskin Tablets also contains Colustrum and  $\beta$ -Casein A2 to strengthen the gut wall.*

*Linkskin Tablets should be combined with Linkskin Spray for maximum support of the gut and skin microbiota.*

## Ingredients:

- **Tyndallised lactobacilli (*Lactobacillus rhamnosus*, *Lactobacillus reuteri*):** microencapsulated to ensure stability within the gastrointestinal tract
- **Vegetable polyphenols:** strong antioxidative activity to help normalise the skin microenvironment
- **Cucumber dry extract:** soothing and antioxidant properties
- **Evening primrose oil, vitamin D3 and beta-defensins:** support the intestinal immune system

## Directions For Use:

Administer once daily by mouth.

- Dogs: 1 tablet per 10 kg bodyweight
- Cats: ½ tablet per 5 kg bodyweight
