Sebum
Regulating
Shampoo &
Spray

Seborrhoea

Seborrhoea means "sebum flow" and includes a number of troublesome dermatological manifestations.

It can be primary or secondary and localized or generalized. Often the condition is characterized by inflammation, greasy skin, dull coat and 'foul odor'. Any genetic or acquired factor that interferes with the rate of mitosis, differentiation and/or epidermal exfoliation can lead to accumulation of visible desquamateous material.

Seborrhoea is mainly secondary to allergic diseases, ectoparasitosis, endocrinopathy, etc. It is a descriptive term and not a definitive diagnosis.

Zincoseb® shampoo

Sebum regulating shampoo for animals with greasy / dry and scaly skin

Zincoseb® Shampoo contains a combination of ingredients that help regulate sebum production and normalise skin cell turnover. It has a keratolytic action to help remove crust and scale. It moisturises dry skin to reduce itching and has an antibacterial and anti-fungal action. It has a short 5-minute contact time for improved owner compliance. Clinically proven and Dermatologist recommended.

Ingredients:

- Salicylic acid
- Colloidal sulphur
- Zinc gluconate
- Salicylic acid
- Chlorhexidine digluconate
- Ethoxylated lanolin
- pH 4.2–4.7

Zincoseb Shampoo can be used alongside Zincoseb Spray for daily management of the skin.

Directions for use

1. Wet the coat with lukewarm water and apply the shampoo
2. Massage all over the body and leave for 5–6 minutes.
3. Avoid contact with the eyes
4. Rinse off with lukewarm water and dry the coat well
5. Repeat once or twice per week for at least 3–4 weeks
6. Safe to use on puppies and kittens.

Zincoseb® spray

Sebum-modulating solution spray with a soothing and moisturising action

Zincoseb® Spray contains a combination of ingredients that help regulate sebum production and normalise skin cell turnover. It moisturises dry skin to reduce itching and has an antibacterial and anti-fungal action. It is easy-to-use and can be used daily. Clinically proven and Dermatologist recommended.

Ingredients:

- Glycerin
- Chlorhexidine digluconate
- Zinc gluconate
- Climbazole
- Aloe glycolic extract
- Urea
- Niacin
- D-panthenol
- AMP126 (peptide)
- pH 5.0–6.0

Zincoseb Spray can be used in-between Zincoseb Shampoo baths to manage the skin daily.

Directions for use

1. Shake the bottle well
2. Spray directly onto the skin and gently massage to increase the absorption
3. Do not wash off. Leave to dry
4. Apply 2-3 times a day
